ACM SIGARCH TRAVEL SUPPORT FOR STUDENTS TO ATTEND
THE 24th INTERNATIONAL SYMPOSIUM ON COMPUTER ARCHITECTURE

As in the past, ACM SIGARCH will provide a limited number of travel grants for student attendees of the 24th International Symposium on Computer Architecture (ISCA'97), Denver, Co, U.S.A. You are invited to submit an application for travel support.

IN ORDER TO BE ELIGIBLE FOR THIS AWARD YOU MUST BE A MEMBER OF SIGARCH AT THE TIME YOU APPLY.

Individual awards will be restricted to the cost of round trip jet economy air fare, or less, depending on the number of applications that will be accepted. Students presenting papers at the symposium will have priority. Such awardees must present their papers at the symposium. Other awards, if funds permit, will be given first to non-presenting student co-authors. There will be a maximum of a 2 full grants equivalent per paper. (That is if a paper has 3 student co-authors, only 2 airplane tickets will be granted)

Applicants supported by other grants and contracts are expected to obtain travel monies from their supporting institutions. Since a limited number of awards will be made under this program, it is important that other sources be used where available.

Applications will be accepted until April 1, 1997 and award recipients will be notified by May 1, 1997. Documented conference registration and original travel expense receipts is required within one month of the end of the symposium. This material should be sent by award recipients to the Chair of SIGARCH. Travel grant recipients are determined by a selection committee without regard to race, color or national origin. The committee is chaired by the Chair of SIGARCH.
